Vision: Realization of graduates who are competent, have the character of IDOLA (Innovative-Discipline-Collaborative), and have an environmental perspective.

Mission :

1. Developing 21st century competencies.
2. Developing habitual "a happy school" (GSM).
3. Carry out CBT learning (Competency Based Training).
4. Creating a learning habitual that is rooted in the nation's religious and cultural norms.
5. Creating entrepreneurship-based learning to form independent and tough individuals in competition.
6. Creating a comfortable, healthy, clean and green environment.
7. Improving the quality of educators, especially group C subject teachers through professional education and training.
8. Providing educational facilities that support the achievement of graduate competencies with internal activities and through collaboration with other parties.
9. Implement quality management system assurance consistently.

School Goals:

1. Preparing students to be able to choose a career and fill job vacancies in industry, the world of work and the business world as a middle-level workforce in accordance with the selected Skills Competency;

2. Equip students with competencies that are in accordance with the selected Expertise Competency;
3. Building the character and behavior of graduates who are innovative, discipline, collaborative ;
4. Preparing students to become productive human beings capable of working independently and persistently in competition, adapting to the work environment and developing a professional attitude in the field of expertise they are interested in. Filling job vacancies in the business and industrial world as a middle-level workforce in accordance with competence in Skills Competency The selected;
5. Creating a clean, green, beautiful and comfortable school image;
6. Improving the competency of group subject teachers through education and professional training;
7. Equipping students with science, technology and art so they are able to develop themselves both independently and through higher education levels;
8. Carry out improvements to the quality of educational products and services for customer satisfaction.

8 Vocational High School of Semarang is located in the middle of Semarang City which is also the capital of Central Java Province. It has the potential to develop a balance between spiritual and social attitudes, knowledge and skills, and apply them in various situations in schools and society; placing schools as part of a community that provides learning experiences, so that students are able to apply what is learned at school to the community and utilize the community as a learning resource; provide sufficient free time to develop various attitudes, knowledge, and skills; develop competencies expressed in the form of learning outcomes which are further specified in subjects; developing learning outcomes into organizing elements (organizing elements) of competence. Develop competence based on accumulative principles, mutually reinforcing (reinforced) and enriched (enriched) between subjects and levels of education (horizontal and vertical organization).

A good school in its learning pattern is learner-centered, interactive (interactive teacher-student-community-natural environment, other sources/media), networked learning, self-study and group (team-based), multimedia-based, pattern reinforcement learning multiple sciences (multidisciplines), and strengthening critical learning patterns. Supported by ideal facilities and infrastructure (availability of learning rooms, practice rooms and open areas) is the main support for creating a good learning process. As a vocational high school, it must be able to channel graduates according to their competency skills by establishing a network with relevant DUDIKA's (Business World, Industrial World, Working World).
